Introduction to Hangzhou International Campus

On May 29, 2023, Hangzhou International Campus of Beihang University was officially inaugurated. The campus is located in the core area of the Science and Innovation Corridor in the west part of Hangzhou, covering an area of 1,000 acres, with a total floor area of 770,000 square meters, well-supported teaching and research facilities, providing students and faculty members with pleasant learning and living environments as well as conditions for research and innovation.

Hangzhou International Campus is equipped with Zhongfa Aviation Institute, which is a secondary school of Beihang and organized by Beihang and the National University of Civil Aviation (NUCA) of France.

According to the cultivation mode of 6-year undergraduate and master degree system, the college offers 4 undergraduate majors of Transportation, Air Vehicle Airworthiness Technology, Measurement and Control Technology and Instrumentation, and Electronic Information Engineering, and adopts Chinese, French and English trilingual teaching, aiming to cultivate outstanding engineers with solid foundation, excellent quality, innovative thinking and international vision.
